

# French Doors

A new build or an extension, whatever the project. French Doors are a great way to fully open up a room to provide additional light and space. A more traditional alternative to patio or bi-fold doors, this stunning style will provide a bright opening onto your patio or garden.

Manufactured to suit your home with a choice of inward or outward openings, ideal if your space is limited. Superior seal for improved weathering protection with PCE concealed gaskets.

Like all our windows and doors you have an unlimited hardware choice, vast range of ancillary products and a wide range of Renolit Foil colour finishes to choose from. The French door also can be designed with aluminium low thresholds for disabled access.
